Subject: Microsoft Settlement

enough! if you re concerned about monopolists check out the oil companies or watch AOL TIME WARNER.. a few years ago the japanese were beating us in every facet of business..our economy was stymied..along came Bill Gates and almost single-handedly gave America a way to vastly improve productivity..instead of trying hold him down we should be building a monument to him.The settlement is more than fair..don t listen to the cry babies..technology changes too quickly for them to expect constant legal vindication (which they don t deserve). Tell them that justice has been served and that they must return to competing if they want success against Microsoft.
